Dr. S. Nair	**Serum**	**12 Jul 2026, 13:35**

Serum Ferritin

CLIA · Advia Centaur

TEST	RESULT	UNIT	REFERENCE RANGE
Ferritin	12 ↓	ng/mL	30 - 400

CLINICAL NOTES

• Serum ferritin reflects body iron stores and should be interpreted in conjunction with iron studies, complete blood count (CBC), and clinical findings.

• Ferritin is an acute-phase reactant and may be elevated in inflammation, infection, liver disease, malignancy, or chronic illness independent of iron status.

• A low serum ferritin concentration is highly suggestive of iron deficiency in the absence of significant inflammation.

SAMPLE FORMAT

Mr. R. Verma
DMLT · Lab Technician

Dr. R. Sharma
MD (Pathology) · Consultant
