

**Mrs. Anita Kumari**

AGE / SEX

34 Y / Female

REFERRED BY

Dr. S. Nair

PATIENT ID

HF-P-004821

SAMPLE

Serum

BILL NO

HF-26-000114

REPORTED

12 Jul 2026, 13:35■ **Prolactin (PRL)**

CLIA · Advia Centaur

TEST	RESULT	UNIT	REFERENCE RANGE
Prolactin (PRL)	11.5	ng/mL	4.0 - 15.2

CLINICAL NOTES

- Prolactin concentrations may be transiently elevated by stress, exercise, sleep, and nipple stimulation. Where clinically indicated, repeat testing under standardized conditions may be considered.
- Hyperprolactinaemia may occur in pituitary disorders, hypothyroidism, pregnancy, renal disease, and with certain medications (e.g., antipsychotics, antidepressants, and metoclopramide).
- Mildly elevated prolactin results should be interpreted with caution and correlated with the patient's clinical presentation.
